

VOINDOM

PE | POLYETHYLENE

**“MINIMUM ENVIRONMENTAL IMPACT,
MAXIMUM RESISTANCE”**

POLYETHYLENE

It is one of the most versatile plastics that exist, with multiple advantages over other materials.

At Vondom we use this material through the **rotational moulding technique** to manufacture different product lines, such as planters and furniture for indoors and outdoors.

We are currently the company with the **widest catalogue of design products made of polyethylene.**

LIGHTWEIGHT

Due to their **low density**, parts made of polyethylene are very light and bulky, which makes them easy to transport.

WATERPROOFING

Due to its impermeability and hollow bodies, it allows the **possibility of integrating interior lighting** achieving IP65 protection.

A man wearing sunglasses and a dark shirt is sitting in a white, curved, modern chair on a beach. The chair is made of a smooth, white material. The background shows a clear blue sky and the ocean. The overall scene is bright and sunny, emphasizing the material's resistance to UV light.

RESISTANCE

Pieces made of this material are distinguished by their **high quality, strength and rigidity**. It is impact resistant, which guarantees a durable product that is difficult to break.

The material is UVI resistant. **UV8 factor, equivalent to 8,000 hours of sunshine** in Florida. It guarantees a prolonged use, withstanding the most extreme weather conditions (-60°C to + 80°C) and preserving the colours during its useful life.

EASY CLEAN

In order to achieve the effects and finishes that characterise Vondom products, **we research and implement the addition of chemical compounds**, one of the most characteristic being "Easy Clean". Making it easier to clean and maintain each part.

S U S T A I N A B I L I T Y

Low density polyethylene is an **ecological material** that has a minimal environmental impact as it is a reusable material.

It is also **100% recyclable**.

CLEANING AND CARE

Our production is governed by the standards of our quality assurance system ISO 9001:2008 and environmental system ISO 14001:2004. And we use only the **highest quality materials** to guarantee a long product life.

Steps to clean outdoor furniture:

1. Spray a grease remover on the surface to be cleaned.
2. Rub with a damp cloth and water.
3. Rinse with plenty of water using a pressurised water system. Caution! Do not use the pressure washer on upholstery and lacquered finishes.
4. Leave to dry outside.

CLEANING AND CARE

Exposure to the sun, especially dark colours, can cause injury through skin contact. Be careful to **check the temperature of the furniture before use during** hours of extreme sunlight.

Place the piece on a **regular surface without slope** to avoid uncontrolled displacements.

For a better conservation of the furniture, it is advisable to **cover each item**.
